ABOUT US

Unique UPVC is the pioneer and largest manufacturer of PVC Profiles for Door Frame, Door Shutter, False Ceiling, Partition, Kitchen Cabinet and Custom molded Profiles. It has taken a step forward by diversifying into manufacturing of uPVC profiles for windows & doors for the first time in northern India.

With rich experience keeping in mind the threat of Global Warming, a mission to “Save Tree and Greenery” Unique UPVC has come out with uPVC profiles for Windows and Doors with special formulation for tropical Indian climate with special additives that ensures long durability to our windows. We have our own design centers and in-house facilities for die and tools manufacturing and state of the art imported machineries. Being specialized in design, extrusion, fabrication, installation and services, Unique UPVC window & Door Systems is a complete solution provider for uPVC windows & doors.

UNIQUE 
UPVC PROJECTS

Specially Developed

Tropical Compound

for High-UV Radiation Areas

In areas with high UV radiation, like India, upvc window profiles need protection from the harmful effects of the sunlight.

UNIQUE UPVC PROJECTS has developed a unique uPVC compound which can withstand UV radiations . Our tropical mix compound has been tested in our lab and confirmed to meet the tropical weathering conditions.

3 Colors & 3 Sizes

Cutting Edge Manufacturing Unit

Our well-developed state-of-the-art infrastructure and manufacturing facilities is located in Jamshedpur, Jharkhand and has European standard extrusions machinery for manufacturing uPVC profiles which is handled and maintained by trained professionals. We adhere to the highest corporate principles and ethics, as well as strict quality policies.

We committed you to providing the best possible solution to our clients' concerns.

Strength and Longevity Testing

We have a specific QA division with in-house laboratory. We conduct quality control researches, processes and Tests on our uPVC profiles, to ensure that they meet international standards. Our QA division works 24x7 to do in-process quality checks on hourly basis.

To ensure that the best quality is delivered to our valued customers, following quality measures are standardized.

- **Dimensions Accuracy**
- **Colour & Gloss Standards**
- **Appearance & Profile Mass**
- **Straightness & Hardness**
- **Heat Reversion & Heat Ageing**
- **Resistance to Impact by Falling Mass**
- **Weld Strength**
- **Gasket & Hardware Fitments**

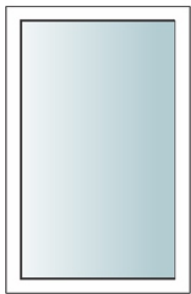

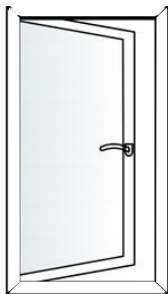

Premium Quality uPVC Windows & Doors

Benefits of **UNIQUE UPVC PROJECTS**

Our environment friendly lead-free uPVC windows & doors provide a wide range of benefits from aesthetics, durability, minimal maintenance, safety & security, to name a few. To assist you in making your decision, we have highlighted some of the major characteristics & benefits of IKONISH uPVC windows & doors.

DURABILITY

UNIQUE UPVC PROJECTS windows are not prone to warping, twisting, or splitting. Our impact modifiers are treated with specific ingredients to make them last longer

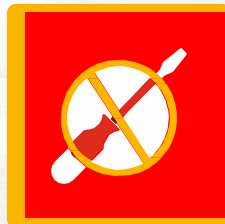

TERMITE & CORROSION RESISTANCE

UNIQUE UPVC PROJECTS windows have termite and corrosion protection built in. Salts, acids, alkalis, and waste gases do not damage the window systems.

SOUND INSULATION

In addition to thermal insulation, they also provide special sound insulation. Sound reductions can be up to 30 decibels.

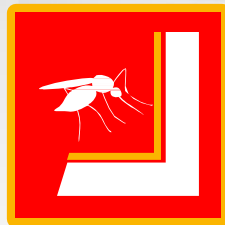

MAINTENANCE FREE

UNIQUE UPVC PROJECTS windows are dirt-proof and easy to maintain. Could only be cleaned up with simple soap water

IAQ

By minimising internal energy loss, indoor air quality (IAQ) may be maintained. IKONISH windows cut energy loss by more than 30%, lowering energy expenses.

BUG MESH OPTIONS

Mosquitoes and other insects are a serious threat. IKONISH provides a bug mesh option for window and door systems to guard against insects.

WEATHER RESISTANCE

UNIQUE UPVC PROJECTS windows are manufactured & engineered considering tropical climatic conditions. Prolonged exposure to sun, rain, wind & humidity never affect the quality & durability.

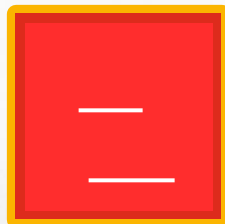

FIRE RETARDANT

UNIQUE UPVC PROJECTS upvc profiles are fire retardant. uPVC is naturally flame retardant and will not cause, support or encourage the development of fire.

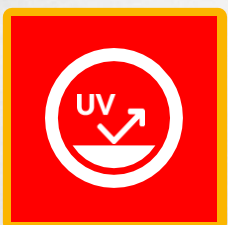

ENVIRONMENT FRIENDLY

Being a "Lead-Free" product it is non toxic & non harmful to our mother nature. It saves our forests & natural resources, by eliminating the uses of wood & aluminum windows. By avoiding deforestation, we support a great extent in minimizing the global warming.

EXCELLENT COST BENEFIT RATIO

When compared to wood frames, which are generally 40% more expensive, IKONISH uPVC profiles saves a lot of costs in terms of maintenance free & energy saving.

UV RESISTANCE

UNIQUE UPVC PROJECTS windows are 100 % UV resistant and contain just the appropriate quantity of Tio2, which aids in the preservation of whiteness when exposed to the sun.

RECYCLABLE

UNIQUE UPVC PROJECTS profile systems are 100% recyclable as it is a green product.

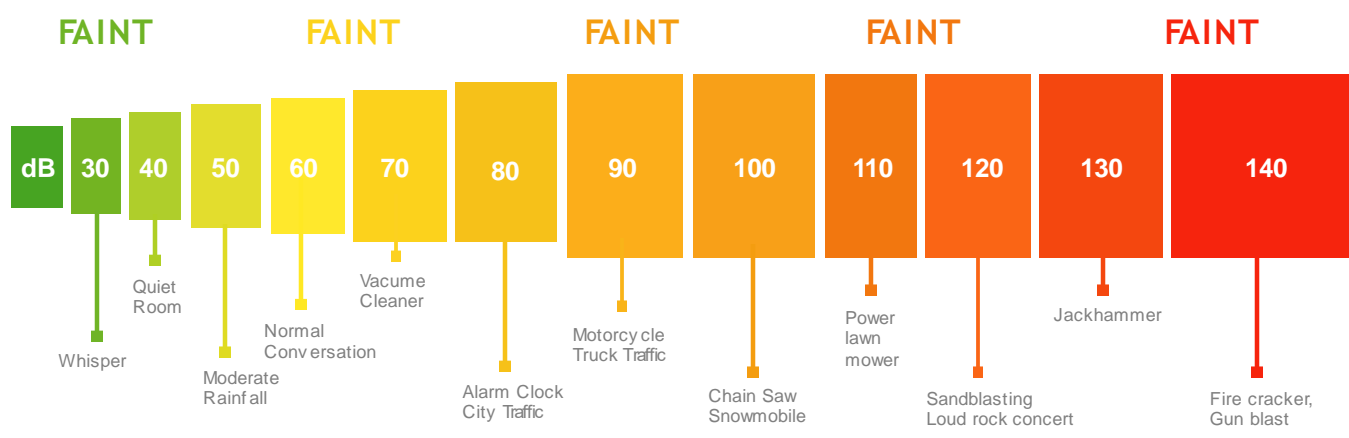

Keep Unwanted Noise at bay

With our UNIQUE UPVC PROJECTS window solutions, you can keep unwanted noise at bay. They are specially designed to minimize the sound levels that enters or escapes your house while also adding an extra degree of security.

UNIQUE UPVC PROJECTS windows are designed to cut down on noise transmission. There is no sound penetration because of the multi chambered profiles, fusion welded connections, multipoint locking system, and dual compression gaskets. UNIQUE UPVC PROJECTS window systems, when combined with recommended glazing and hardware, may insulate your interiors from unwanted sound by up to 40 decibels.

Environment	dB
Library	30-40
Bedroom	30-40
Classroom	35-40

Private Office	40-45
Open Office	45-50

GO GREEN SAVE MORE

Save your electricity cost by

30%

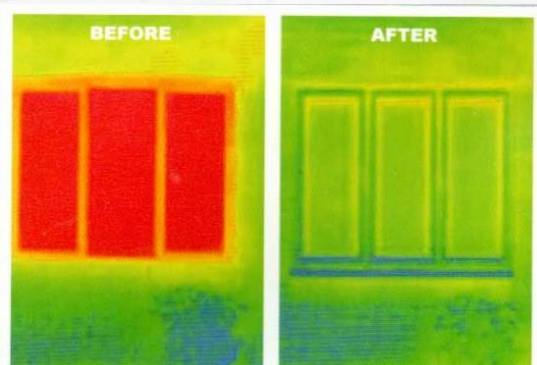

Windows are an essential component of house heating and cooling expenses since they not only offer aesthetic appeal and are frequently a very vital part of a home. In the winter, bad windows lose more heat per square foot of area than any other surface in the house, while in the summer, they absorb more heat.

UNIQUE UPVC PROJECTS has drastically improved the energy efficiency of windows today. By lowering your carbon footprint, UNIQUE UPVC PROJECTS energy efficient window solutions will make your house more pleasant, save your energy bills, and contribute to a brighter, cleaner, and healthier environment.

**DID YOU
KNOW?**

That poorly insulated windows and skylights can cause a loss of up to 30% of your home's cooling cost during the summer

Thermal image of house window showing large heat loss as indicated in red.

Same window fitted with new uPVC window showing no heat loss in green
